How to Use This Book

Welcome to the world of Super Stars! This book is filled with times tables facts to help you learn the basics of multiplying and dividing—all while having fun!

Read about each new topic before you dive in to the activities.

Test your knowledge with exciting activities throughout.

4 x Table

Let's have a go at the 4 x table. If you know your 2 x table, then your 4 x table is no problem. Just *double* your *multiple* from the 2 x table to get the matching multiple in the 4 x table!

$$1 \times 2 = 2 \quad 1 \times 4 = 4 \quad \text{Double } 2 \text{ is } 4$$

$$2 \times 2 = 4 \quad 2 \times 4 = 8 \quad \text{Double } 4 \text{ is } 8$$

$$1 \times 4 = 4$$

$$7 \times 4 = 28$$

$$2 \times 4 = 8$$

$$8 \times 4 = 32$$

$$3 \times 4 = 12$$

$$9 \times 4 = 36$$

$$4 \times 4 = 16$$

$$10 \times 4 = 40$$

$$5 \times 4 = 20$$

$$11 \times 4 = 44$$

$$6 \times 4 = 24$$

$$12 \times 4 = 48$$

Say each multiplication out loud, replacing the "x" symbol with "times," "multiplied by," "lots of," or "groups of."

A *multiple* is a number you get when you multiply two numbers together, e.g. the multiple of 2×4 is 8. There are two 4s in 8 and eight 2s.

Can you think of a multiple of 5?

27

All new topics come with practice activities to learn key skills.

Learn the Symbols ($\times$ $\div$ $=$)

To start multiplying and dividing, these are the symbols you'll need to know.

"TIMES," "MULTIPLIED BY,"
"LOTS OF," OR "GROUPS OF"

"DIVIDED BY" OR
"GROUPING"

"IS EQUAL TO"

MULTIPLICATION

Here we have 3 **groups** of 2 oranges, which is equal to 6 oranges. 3 **multiplied by** 2 is equal to 6.

6

Division is the opposite of multiplication. To share 6 oranges equally, you need to divide them. 6 oranges **divided by** 3 is equal to 2 oranges.

$\div$ 3

= 2

DIVISION

Pick the correct symbol to make the number sentence correct.

$$2 \text{ (?) } 4 = 8$$

$\times$ or $\div$

$$8 \text{ (?) } 2 = 4$$

$\times$ or $\div$

Multiplication: Repeated Addition

When we use multiplication, we are simply doing *repeated addition*.
 $3 \times 2 = 6$ is the same as $2 + 2 + 2 = 6$.

Here is another way of showing repeated addition. It's called a bar model.

Missing Numbers

Rewrite this multiplication as repeated addition.
Add the correct amounts of fish.

$$4 \times 2 = 8$$

Monkey Match Up

Draw a line to match each multiplication to the correct repeated addition and bar model?

$$2 \times 3 = 6$$

$$4 \times 5 = 20$$

$$3 + 3 = 6$$

$$5 + 5 + 5 + 5 = 20$$

10 × Table

Let's start learning our times tables. We will begin with our 10 x table.

$$1 \times 10 = 10$$

$$8 \times 10 = 80$$

$$2 \times 10 = 20$$

$$9 \times 10 = 90$$

$$3 \times 10 = 30$$

$$10 \times 10 = 100$$

$$4 \times 10 = 40$$

$$11 \times 10 = 110$$

$$5 \times 10 = 50$$

$$12 \times 10 = 120$$

$$6 \times 10 = 60$$

$$7 \times 10 = 70$$

Say each multiplication out loud, replacing the "x" symbol with "times," "multiplied by," "lots of," or "groups of."

Division: Sharing

Division is the opposite of multiplication. We can think of division as sharing an amount into equal groups.

$$10 \div 5 = ?$$

Let's share 10 apples into 5 bowls equally. We can move each apple one by one until we have used all the apples. How many apples are there in each bowl/equal group?

$$10 \div 5 = 2$$
